

10/25/82

Recommendation to Remove the Marshall Road Disposal Site Nomination from Consideration for the National Priorities List (NPL)

Dick Whittington, P.E.

Regional Administrator, Region 6

/s/ Frances W. Phillips for

William Hedeman, Director

Office of Emergency & Remedial Response (WH-548)

Attached is a copy of a letter from the Texas Department of Water Resources (TDWR) requesting that the Marshall Road Site be removed from consideration for the NPL. The Department has reached an agreement with the responsible parties, Velsicol Chemical Company and Hitco Chemical Company, to clean up the site. The clean-up is scheduled to begin the week of October 25; therefore, the site will be cleaned up prior to publication of the proposed NPL. Bill Hathaway of my staff discussed this matter with Messrs. Caldwell, Hess and Morekas (acting for Mr. Myer) on October 19, 1982. It was their opinion that if the work was complete by November 5, 1982, and a letter to that effect was received from the State, it was possible to withhold the site from publication of the list. In light of these new developments, we recommend that the site be removed from consideration for the list at that time.

If you have questions concerning this recommendation, please contact William B. Hathaway of my staff at FTS 729-9709.
